I request for MALDI-Imaging measurements on the autoflex speed™ LRF MALDI-TOF mass spectrometer.

Description of the requested service:

Sample type

Tissue origin (e.g. mouse)

Tissue type (e.g. kidney)

Tissue preservation

cryo

formalin-fixed

other

(please tick)

if other, please specify:

Embedding material:

not embedded

embedded in:

Sectioning

The sample is already sectioned

and mounted on an indium tin oxide coated slide.

The sample is not sectioned

Requested section thickness [μm]

Section plane (e.g. longitudinal)

Matrix application and sample preparation

yes

no

Matrix application is requested

I have FFPE material that has to be trypsinized

Measurement specification

I am interested in protein measurements (m/z range 2000-20000)

I am interested in peptide measurements (m/z range 500-3000)

I am interested in small molecule applications

I need a lateral resolution of _____ μm . (Less than 50 μm is currently not possible).

Special requirements:

I declare that my sample does not contain biohazardous material. I accept that the MALDI Imaging Core Facility does not guarantee the quality of the measurement.
